

Weed Pay

\$WPAY

WHITEPAPER

THE SEED

***\$WPAY** is a BSC token, launched on the Binance Smart Chain on August 20, 2021. The token supply is 1000 trillion, 50% of them have been burned.*

*One of its key factor is **decentralization**, in order to be an actual currency for transactions in every field of the legal cannabis industry and commerce.*

*Weedpay's **liquidity is locked** on Pancake Swap Pools and listings are constantly added by many passionate supporters in a growing number of different exchanges.*

THE ROOTS

A century of prohibition hasn't stopped the cannabis culture from spreading everywhere. Never stopped artists, manufacturers, researchers, writers, builders, fashion designers, just to name a few, from spreading knowledge about all you can do with this amazingly versatile plant, despite the well known stigma that still surrounds it.

Weedpay was born to ease the transactions between companies, stores, dispensaries, and every individual operating in the legal cannabis business, and for investors who believe in a more sustainable future. The legal cannabis industry, in its many flavors, is booming everywhere, Weedpay was born to be part of it

THE PLANT

Weedpay's branches are plentiful and vigorous. The legalization trend is spreading fast and as we speak, many more countries have legalization in their political agenda. That means hundreds of thousands, if not millions, of new work opportunities in the field of legal cannabis. That means a huge number of potential users of a dedicated currency that's supposed to raise its value over time, thanks to a market that's potentially going to flourish in the very next future. But Weedpay is also a big community where every holder, or supporter is entitled to actively participate, because the future of Weedpay belongs to all of us, holding together for wealth, but also for freedom.

THE BUDS

Nowadays, the benefits of cannabis based therapies for pain relief, and for the treatment of many serious illnesses, once exclusively treatable with heavy and sometimes debilitating chemical therapies, are well known all over the world. Despite that, even though it's basically legal everywhere, and countless reserarches have proven how the benefits are hugely superior to the few side effects, just a few doctors are well informed about it, and the lack of financial help for the research on medical cannabis, makes the life of the patients harder than it should be. One of the first priorities of the Weedpay Team is to stop disinformation, and help researchers and patient associations with charity events, when certain objectives will be achieved. Helping each other is what a community is made for, and we're ready to.

WHAT IS WEEDPAY?

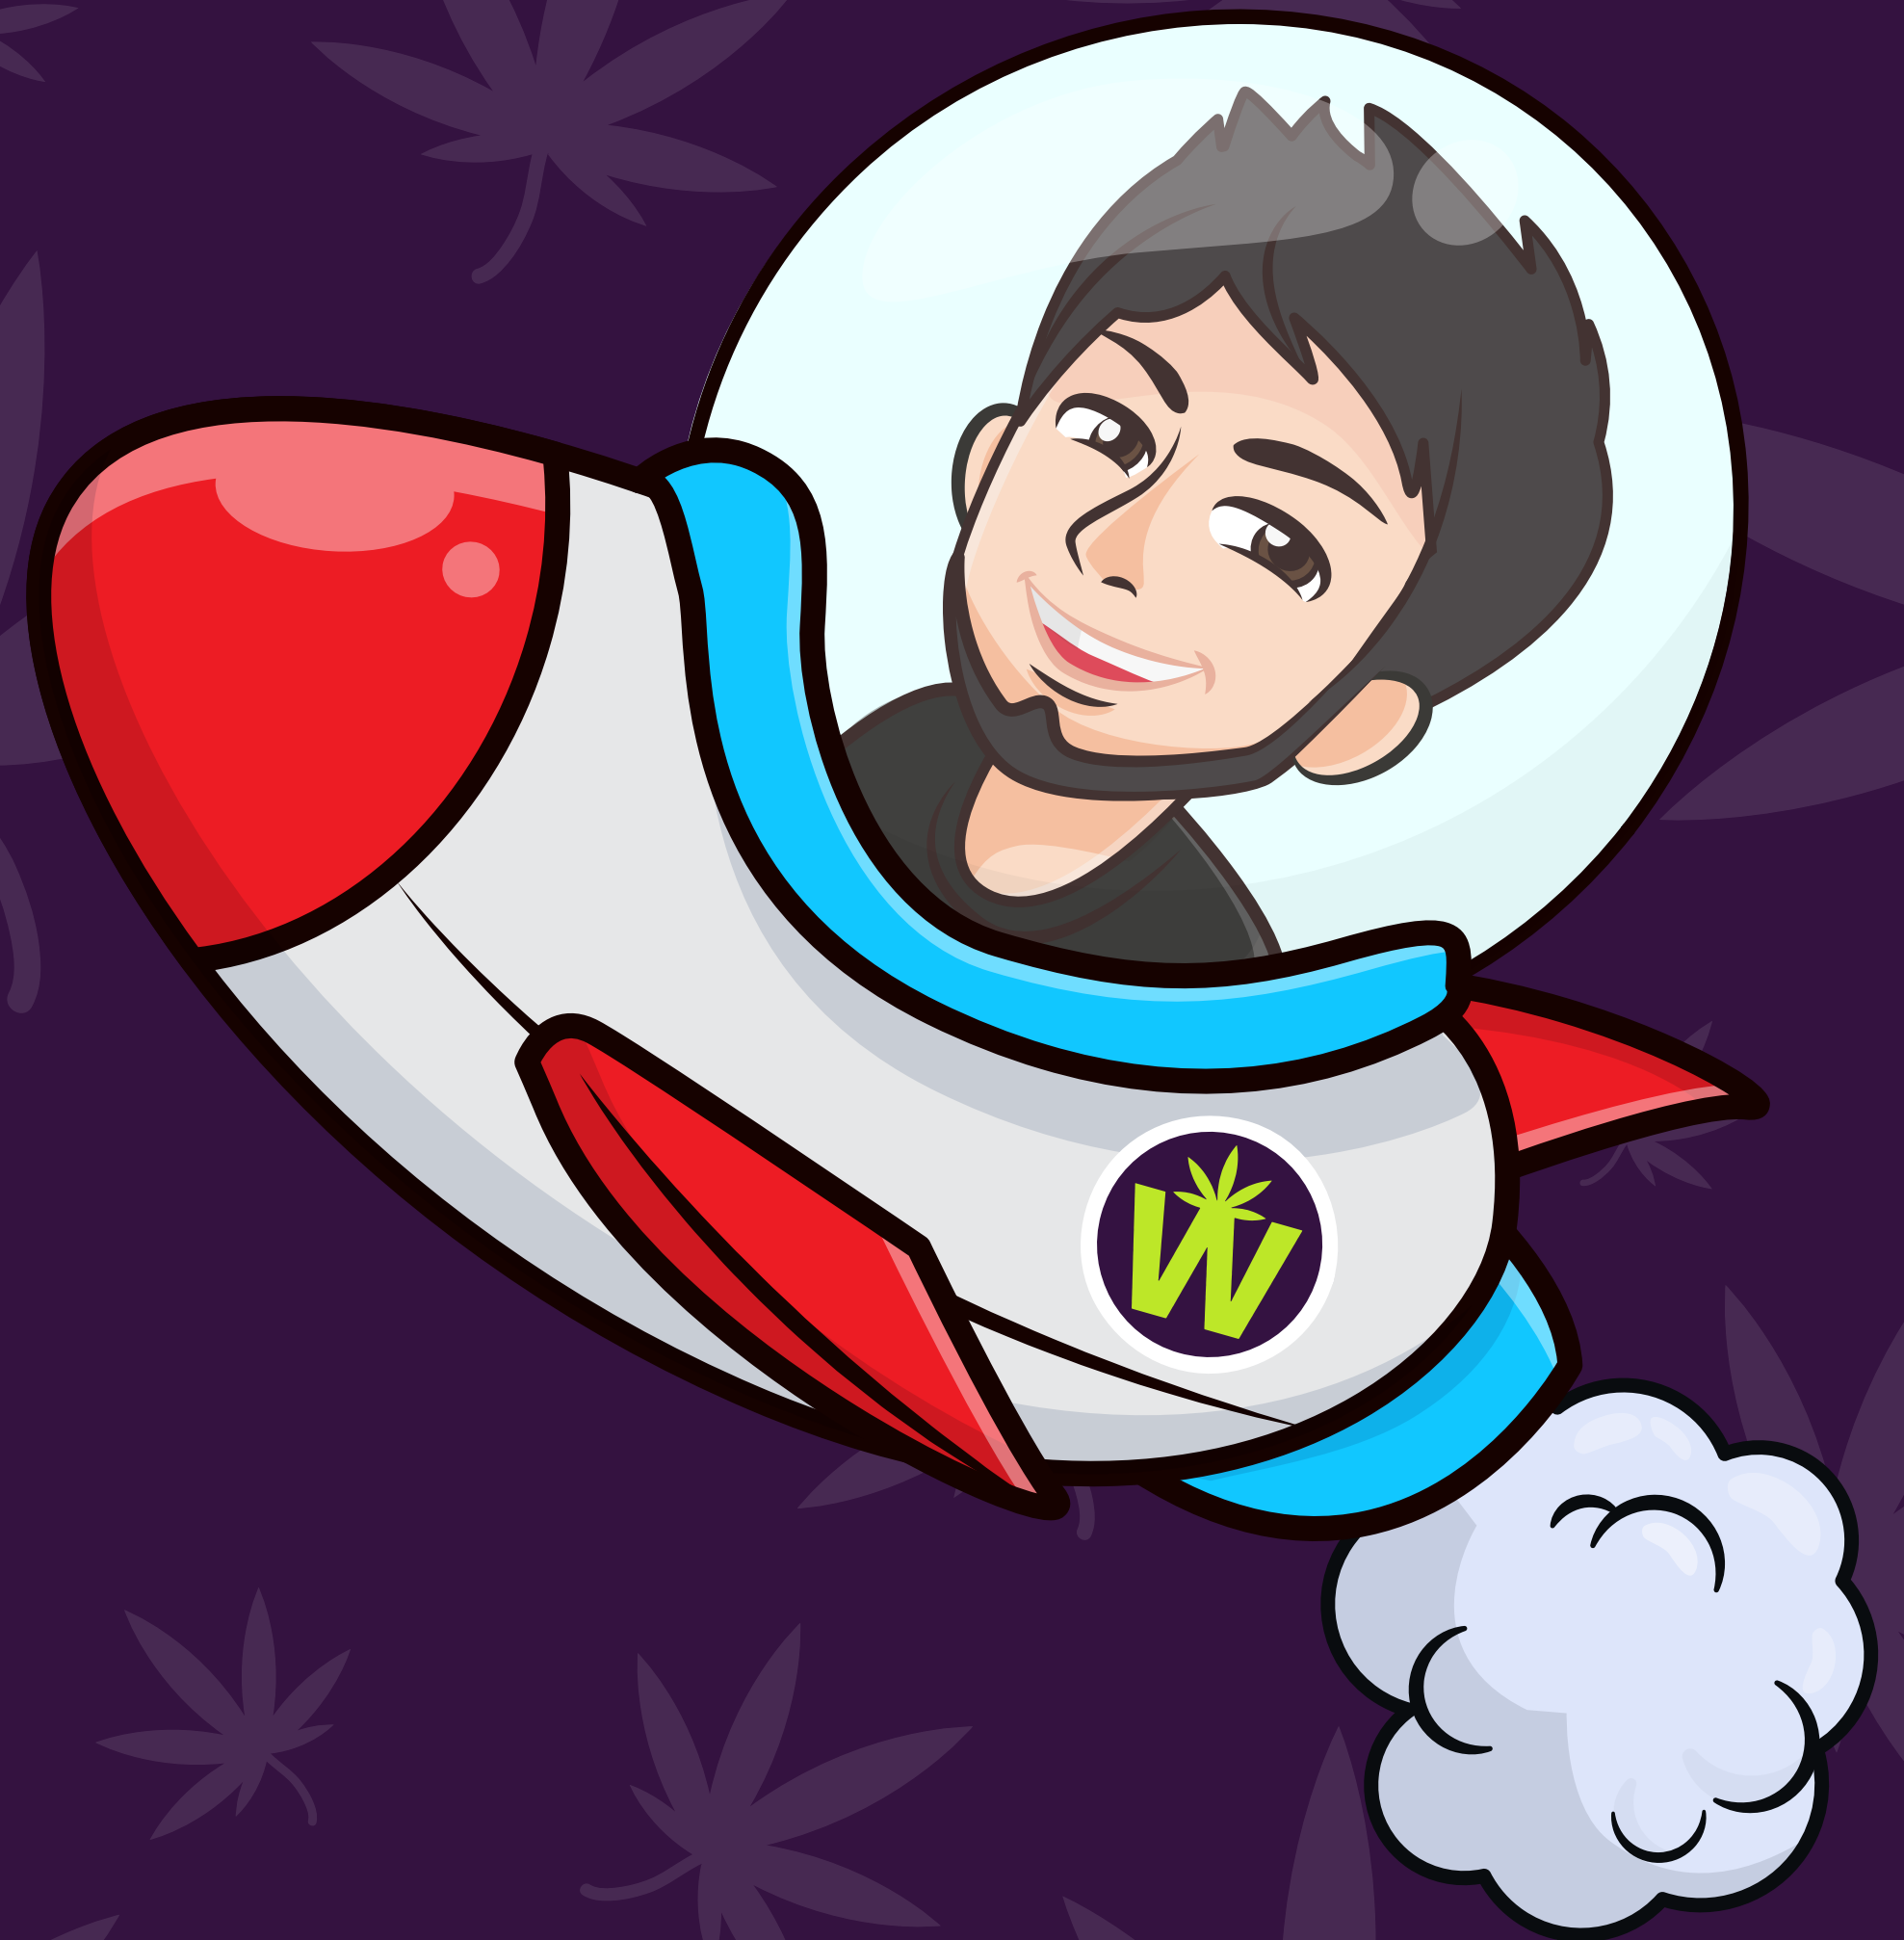

Weed pay is the currency of independence.

Weed pay is our rebellion.

Weed pay is a utility token.

*Weed pay is more than a community,
it's an ARMY.*

**WEED PAY IS A STEP TOWARDS WORLDWIDE
LEGALIZATION**

THE PROJECT

The Weedpay Team is working hard in order to become the most popular cryptocurrency in the entire production chain of legal cannabis.

2021 will be remembered as one of the most crypto-friendly times in recent history, while cannabis industry, in its many flavours, is booming everywhere. Whether you're a store owner, a legal grower or a manufacturer, the advantages of Weedpay as payment method, are easy transactions with a dedicated currency that's supposed to raise its value over time.

*The core of such an ambitious project will be the **WeedCard**, our branded prepaid card, for easy payments all over our affiliates network. Using your **WeedCard** will reward you with exclusive discounts and/or a cashback for every transaction. In order to make it all even friendlier, an **App Wallet** is on the way. There, you will find all you ever wanted to know about the Weedpay network, and more.*

Our starting point is Italy, then Spain and Holland, next step the rest of the world, and further.

WE SUPPORT THE MEDICAL USE OF CANNABIS

Weedpay supports the research: five millions of people all over the world, are affected by Parkinson's disease and more than two millions are suffering for Multiple sclerosis”.

Medical cannabis is very effective, in order to counteract the severe symptoms of those medical conditions and give relief to those patient. Unfortunately, very few doctors are willing to prescribe cannabis therapies to them, partly due to poor medical research.

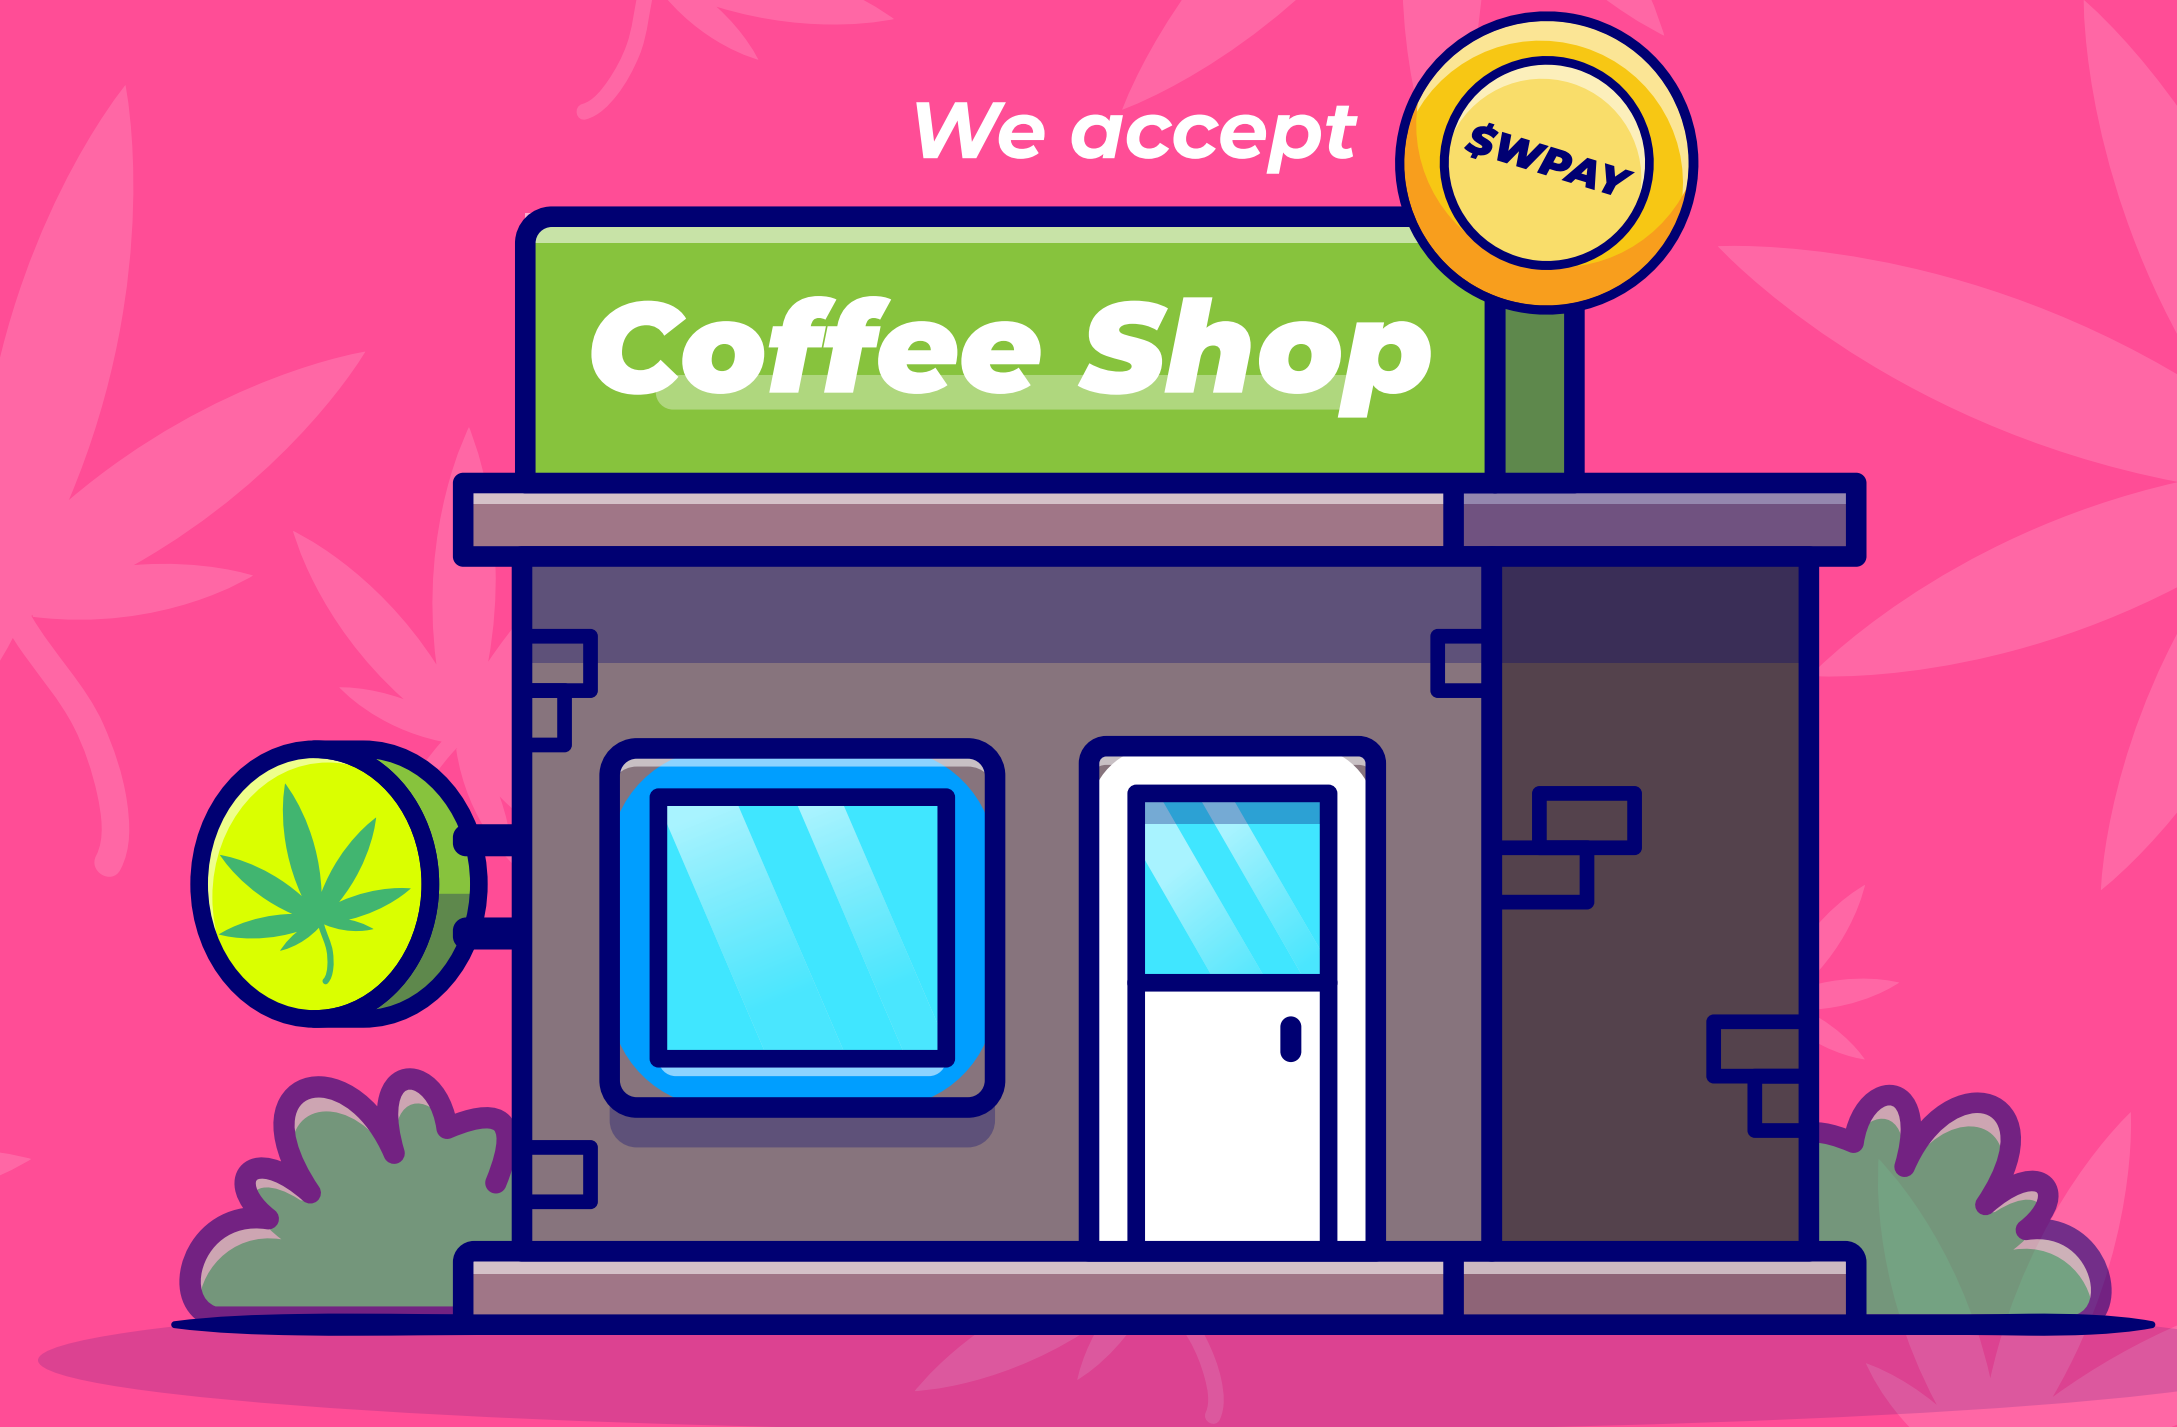

Weedpay will pledge to make donations for the research and development of cannabis-based medical therapies.

WEEDPAY \$WPAY IS AN UTILITY TOKEN

We dream that every social club in Spain, every coffee shop in Amsterdam, every shop in California and every dispensary in the world gets paid in WEEDPAY.

This is highly possible, thanks to the support of several anti-pro associations and shop managers

WEED PAY
